ORIGINAL DOORS & MOLDINGS

is proud to make available our Book of Architectural Antique and Original Moldings, the first of its kind in more than 100 years.

Shown in both exact size and reduced scales, these moldings have been categorized by: those in stock, pages 1-14; those of special order, pages 15-30; and a section referring to those moldings used by architects and builders from 1850 to 1920 in vintage dwellings.

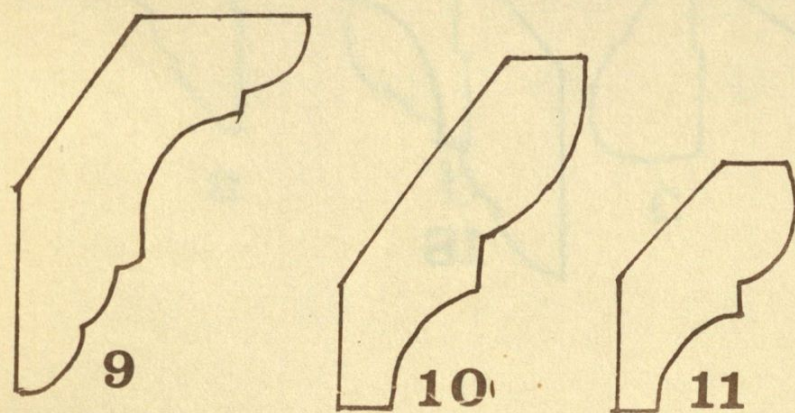

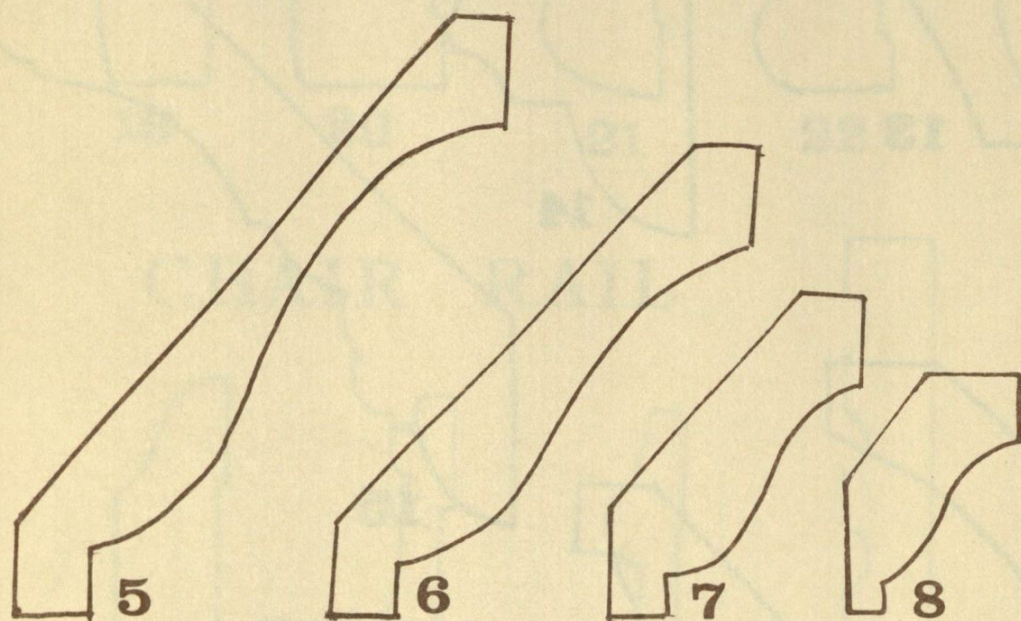

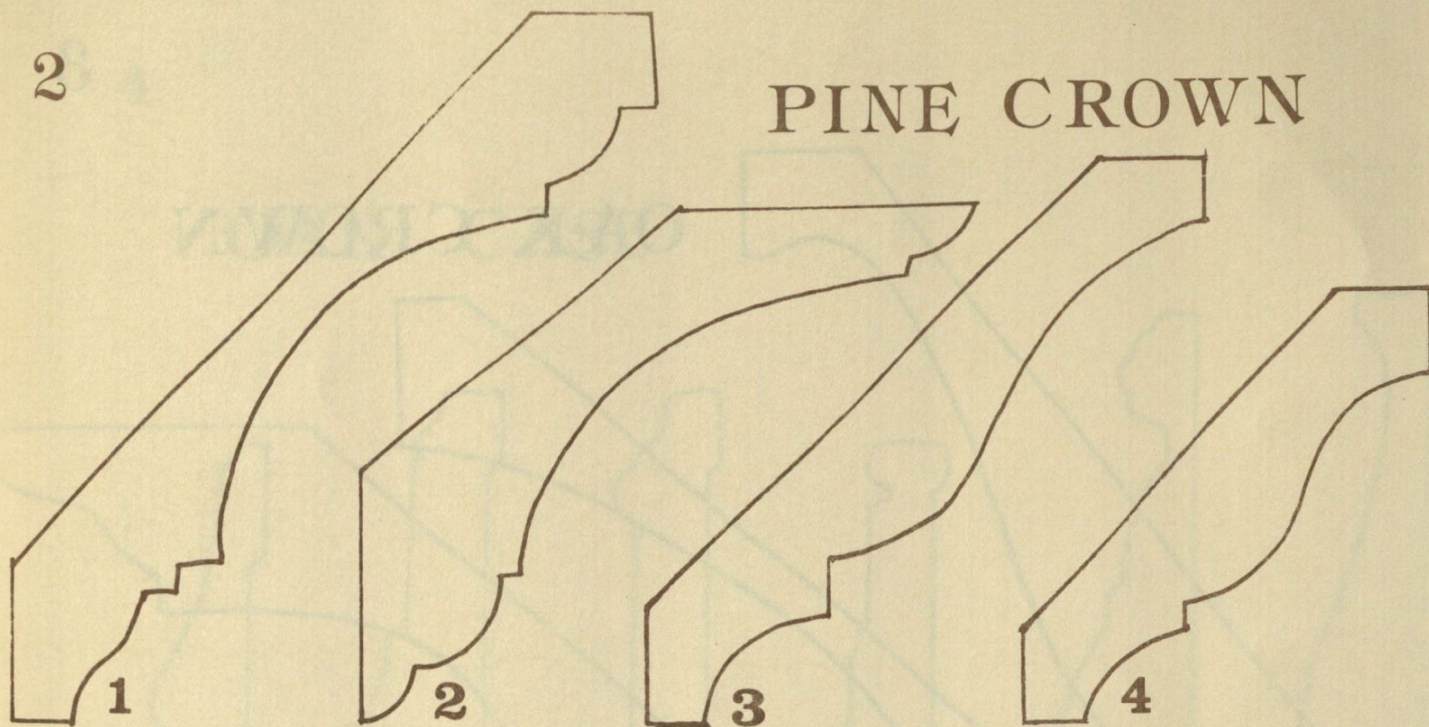

Our selection can be employed in both restoration and in new construction. Construction moldings are commonly used on building exteriors, while finish moldings are used for interior architectural finish. When our moldings are used accurately, one can restore or create authentic Victorian styles.

Moldings, where applicable, are dated according to the years in which they were most commonly employed in Beverly Hills mansions and in the beautiful Victorian homes of San Francisco.

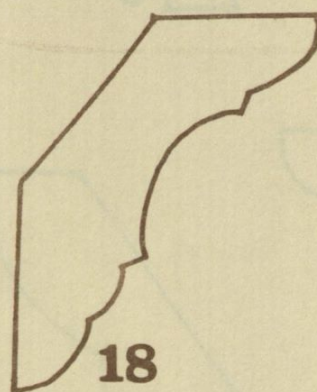

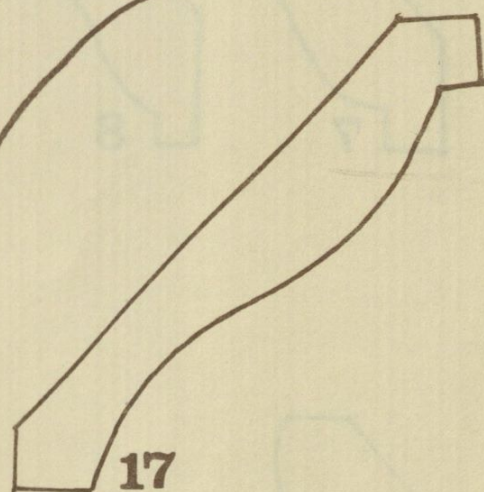

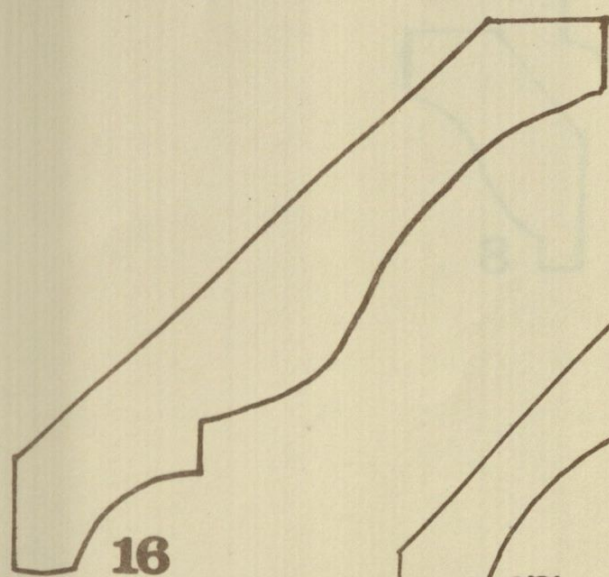

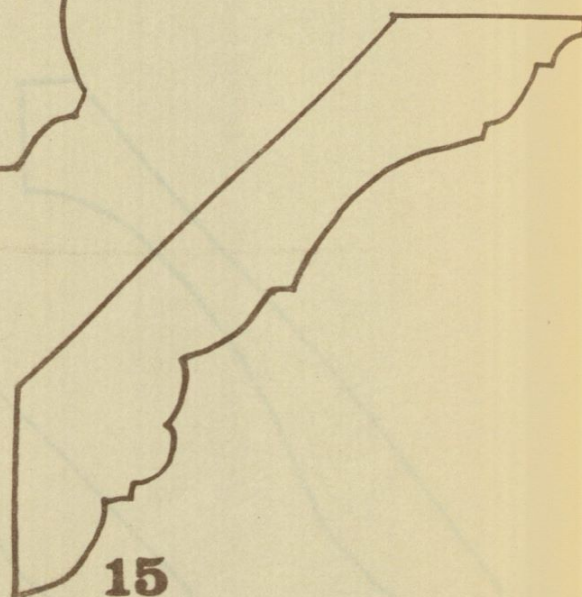

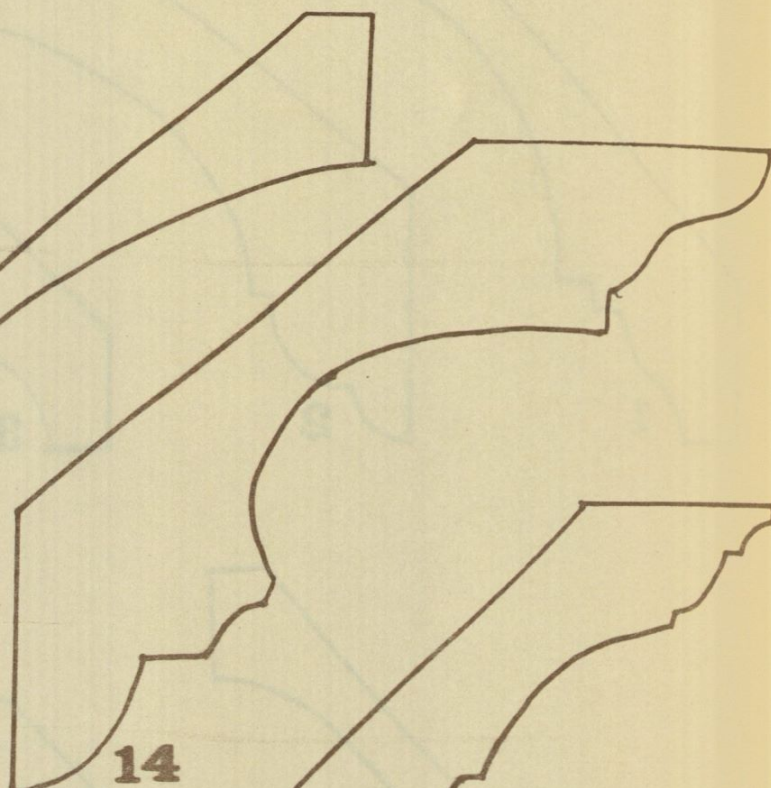

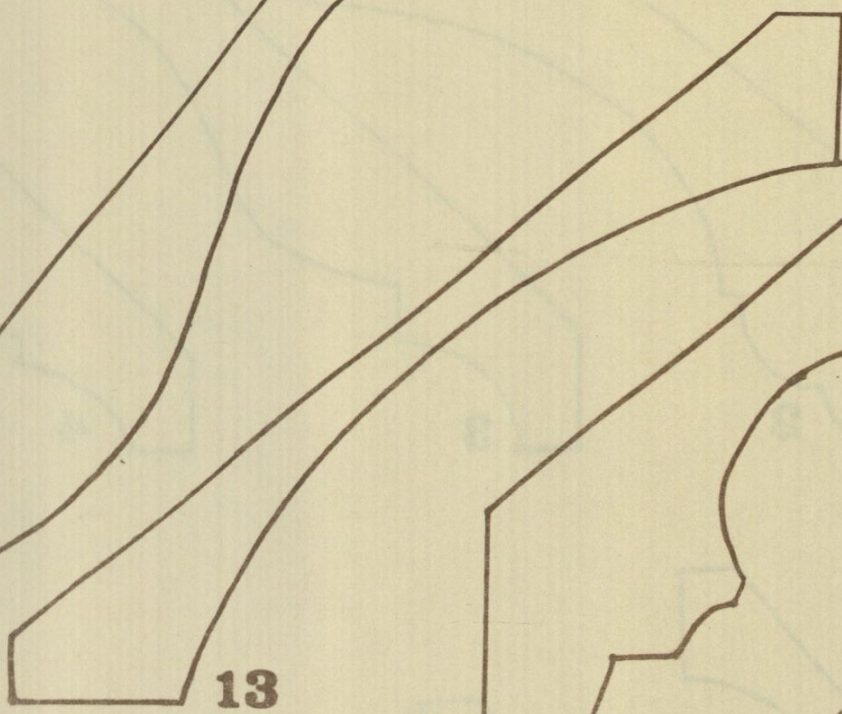

In-stock moldings are milled in bright clear pine and red oak and are suitable for paint, stain, varnish and lacquer finishes. These moldings are generally available upon demand. Special order moldings and the moldings in the Victorian section are available in quantities of 350 feet or more and most any type of material. These custom orders take three to five weeks to deliver. All moldings come in random lengths only, consisting of 15% 3' to 6' lengths. All reasonable effort will be made to keep overage to a minimum on specified lengths ordered. We do not guarantee any size or grade of hardwood or softwood product against cupping, buckling, shrinking or warping.
